ABOUT ME

Engineering student with solid working experience in FrontEnd development. My passion for innovation drives my proficiency in front-end development. I excel at crafting applications that consistently surpass expectations, and my commitment to tackling challenges sets me apart as a unique talent in the field.

EDUCATION

- 2021 - 2024 **Engineering Degree in Software Engineering** **National Engineers School of Tunis**
Complete a 3-year program at ENIT, consisting of 2 preparatory years followed by 3 years in software engineering. My training encompasses various aspects of the information technology field, including software development, IoT, and embedded systems, preparing me for a successful career in the technology industry.
- . 2019-2021 **Preparatory** **Bizerte preparatory institute for engineering studies**
Followed a demanding two-year preparatory program at IPEIB, focusing on mathematics and physics. This intensive training was decisive in my academic career, paving the way for my subsequent studies in software engineering.

EXPERIENCE

- 2024 **Full Stack Developer** **Decotis**
Full Time Remote Job
Full-time remote position assisting Decotis in building their website for interior design, combining creativity and technical skills to enhance online presence and user experience. Dedicated to crafting an aesthetically pleasing and functional platform that aligns with Decotis' design philosophy.
Angular / spring boot / Gitlab / Ubuntu / Docker / jira / atlassian / agile
- 2023 **FrontEnd Developer** **Wildcat Applications**
Part time job
reorganize Cenefits React application, create elegant marketing websites and improve the interface with modern technology at Wildcat Applications. Improve digital experiences with precision.
React js / redux / Alpine js / antd / jira / atlassian / agile
- 2023 **FrontEnd Developer** **Friends in flat**
Part time job
Part-time work at Friends in Flat, an Austrian start-up, actively participating in the development and continuous improvement of their website. This collaboration merges friendship and innovation at the heart of our work culture.
Next.js / node js / Express / Docker
- 2022 **FrontEnd Developer** **EmyeHR**
Working student
Contributed to ERP project using React.js as a working student.
React js / Redux / Babel
- 2022 **FrontEnd Developer** **Data Era**
Internship
Supervision of the development and optimization (80% improvement) of a tailor-made e-commerce connection site, significantly improving the user experience and promoting dynamic customer interactions.
React js / node js / Jenkins / Git / Github

CERTIFICATES

- 2022 **CCNA v7 Introduction to network (Cisco)**

PROJECTS

- 2024 **Instagram clone**
React Vite Instagram-Like landing page! This project showcases a simple landing page similar to Instagram, where users can view posts.
Technologies: React js / Tailwind css / responsive design
- 2024 **Invoice generator**
An Invoice Generator project built with React and TailwindCSS. Add items, quantity, prices, tax rates and discounts.
Technologies: React.js / Tailwind css
- 2024 **React e-bank landing pae**
React frontend landing page for an e-bank presents a user-friendly interface for managing accounts and accessing financial services online, emphasizing simplicity and modern design.
Technologies: React.js / Tailwind css / Vite
- 2023 **E-shop landing page**
This is a sample e-shop web application for selling electronic components and devices. The project is built with React, Vite, and Tailwind CSS.
Technologies: React / TS Tailwind CSS / Vite
- 2023 **Trip planning app**
Design and development of "Travel Planning", a user-friendly application that enhances travel by providing real-time destination and weather information.
Technologies: Google Maps Api / HTML / Tailwind css / JavaScript / Weather Api
- 2022 **Space portfolio game**
Created an exciting 2D space game to deploy on AWS using EC2 and CodeBuild for CI/CD. This demonstrates my game development skills and mastery of the AWS cloud.
Technologies: HTML / CSS / JS / Canvas
- 2022 **Meditation mobile app**
Flutter meditation app offering guided sessions and calming music .
Technologies: Flutter

PROGRAMMING LANGUAGES

Python , PHP , C/C++ JavaScript , TypeScript , PL/SQL , C# , Java

TECHNICAL SKILLS

- Front-end Frameworks **Angular , Bootstrap React.js , Tailwind CSS , Next.js ,Webpack ,Gulp ,Vue.js ,Babel, Redux**
- Back-end Frameworks **Spring Boot , GraphQL ,**
